

## 6.14 Finding The Point(s) Of Intersection Of A Circle And A Line

EXAMPLE:

Find the points of intersection of the circle  $x^2 + y^2 - 6x - 10y + 9 = 0$  and the line  $x - y = -7$ .

Solve both the equation of the line and the equation of the circle simultaneously:

For the line: express one variable in terms of another, **then substitute** into equation of the circle.

$$x - y = -7 \quad \Rightarrow \quad y = x + 7$$

Substituting:  $x^2 + (x + 7)^2 - 6x - 10(x + 7) + 9 = 0$  ... we end up with a quadratic,  
 $\Rightarrow x^2 + (x + 7)(x + 7) - 6x - 10x - 70 + 9 = 0$  expressed in terms of  $x$ , alone.

$$\Rightarrow x^2 + x^2 + 7x + 7x + 49 - 6x - 10x - 70 + 9 = 0$$

$$\Rightarrow 2x^2 - 2x - 12 = 0$$

$$\Rightarrow x^2 - x - 6 = 0 \quad \dots \text{dividing both sides by 2}$$

$$\Rightarrow (x + 2)(x - 3) = 0$$

$$\Rightarrow x = -2 \quad \text{and} \quad x = 3$$

Substitute your obtained  $x$  coordinates into equation of **the line**, not the circle.<sup>vii</sup>

$$y = x + 7$$

$$y = (-2) + 7 \\ = 5$$

$$y = (3) + 7 \\ = 10$$

~~$$x^2 + y^2 - 6x - 10y + 9 = 0$$~~

~~$$(-2)^2 + y^2 - 6(-2) - 10y + 9 = 0$$~~

~~$$4 + y^2 + 12 - 10y + 9 = 0$$~~

~~$$y^2 - 10y + 25 = 0$$~~

~~$$(y - 5)(y - 5) = 0$$~~

~~$$y = 5 \quad \text{and} \quad y = 5$$~~

~~$$(3)^2 + y^2 - 6(3) - 10y + 9 = 0$$~~

~~$$9 + y^2 - 18 - 10y + 9 = 0$$~~

~~$$y^2 - 10y = 0$$~~

~~$$(y - 10)(y - 0) = 0$$~~

~~$$y = 10 \quad \text{and} \quad y = 0$$~~

$\therefore$  The points of intersection are  $(-2, 5)$  and  $(3, 10)$ . (Compare with graph, above.)

<sup>vii</sup>It will work for both the line and the circle equations, because both points are on the line and the circle, concurrently. When you plug a single coordinate into the equation of a circle, it can give you two answers, however. That's because you are effectively plugging in the equation of a horizontal or vertical line e.g. " $y=0$ ", " $x=-2$ " or " $x=3$ ", and there can be two places of intersection.

## Project Maths Notes<sup>™</sup> for Leaving Cert

- It's an **investment** in the future of any young person
- Prepares you for the most difficult exam **questions**
- Sorts out **common problems** most students have
- Enables the learner to actually **understand** maths
- Download to your **smart device** - study **on the go**

**HIGHER /  
ORDINARY**
